Business and Markets

Founded in 1982, Cypress Semiconductor provides high-performance integrated circuit solutions to fast-growing markets, including data communications, telecommunications, computation, consumer products, and industrial control. Growing approximately twice as fast as the semiconductor industry, Cypress in 2000 deployed four market segment profit-and-loss centers cutting across the company's existing product divisions to enhance its focus on the communications markets – wide area networks, storage array networks, wireless infrastructure, and wireless terminals.

More than two-thirds of Cypress's sales come from dynamic companies in communications markets such as Alcatel, Cisco, Ericsson, Lucent, Motorola, Nortel Networks, and 3Com. Cypress's ability to mix and match its broad portfolio of intellectual property enables targeted, integrated solutions for high-speed systems that feed bandwidth-hungry Internet applications.

Product Portfolios and Solutions

Cypress's product solutions include:

- High-speed physical layer port products
- Optical communications products
- High-bandwidth backplane solutions
- High-bandwidth multiport and FIFO memories
- High-density programmable logic devices
- Timing technology solutions
- Universal Serial Bus (USB) controllers
- Programmable system-on-chip microcontrollers
- Wireless Bluetooth devices
- Synchronous, fast and micropower static RAMs

Executive Management

T.J. Rodgers	President and CEO
Emanuel Hernandez	VP Finance and Administration, CFO
Ralph Schmitt	VP Sales and Marketing
Dan Morris	VP WAN and Storage Networks
Steve Whelan	VP Wireless Infrastructure and Wireless Terminals
Antonio Alvarez	VP Memory Products
Ilbok Lee	VP Timing Technology
Christopher Norris	VP Data Communications Products
Cathal Phelan	VP Interface Products
Christopher Seams	VP Worldwide Wafer Manufacturing
Arthur Woodward	VP Assembly and Test
